October 10, 2003

Dear Sirs

This letter is to give a performance indication from company AMS in South Korea for the Oasys Twin Stack Laminator.

AMS had the Oasys Twin Stack system with 12 daylighters installed early 2001.

I can confirm that we are very pleased with the performance of this machine. As Visa, MasterCard and Contactless Card, high volume manufacturers, we have great demands for quality and consistency. The Oasys machine has been very good in all these areas and has exceeded our expectations.

We are also very happy with after sales service and support provided by Oasys Technologies Ltd.

Yours sincerely,

Dongseon Moon
